

# Making the most of your device

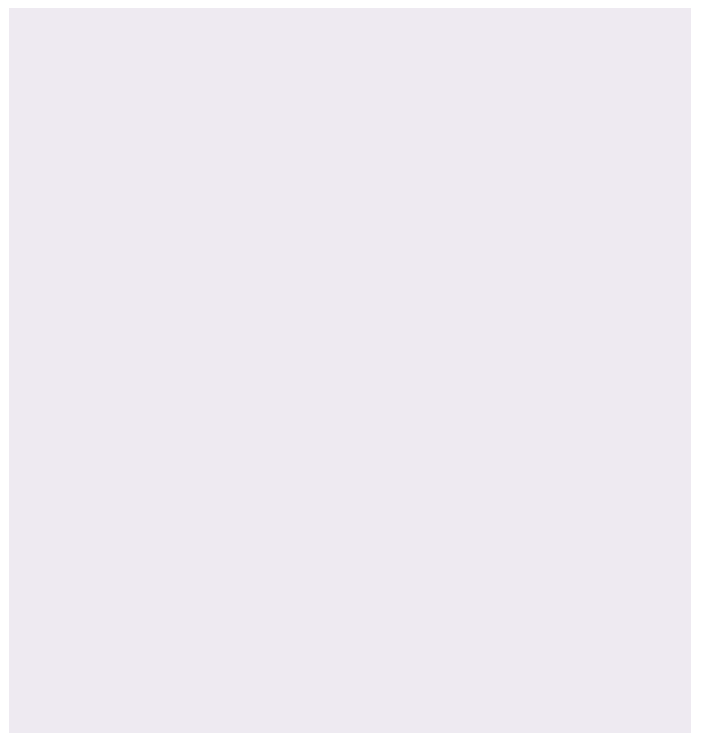

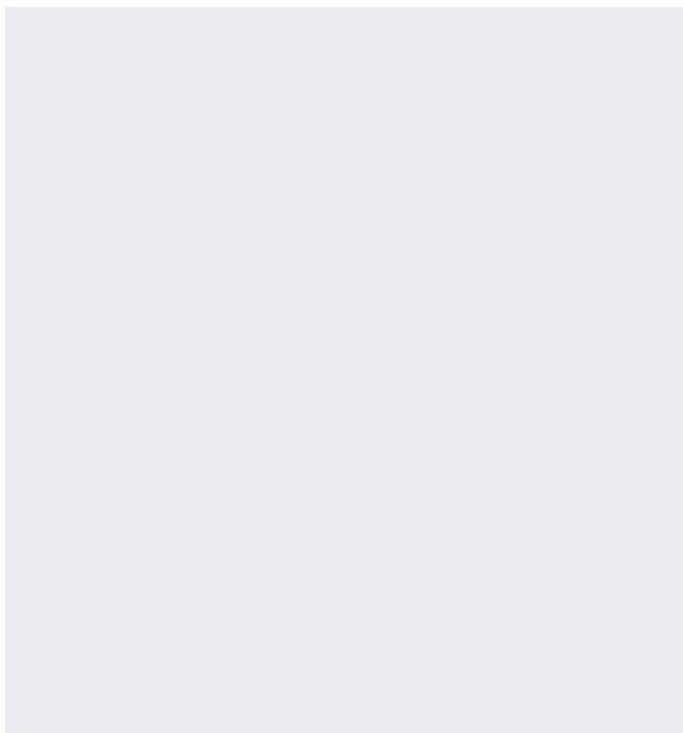

Age UK has a range of guides to help you get the most out of your device. These guides are available in large print, audio and video formats. You can also get a copy of our guides in Braille. For more information, please contact our helpline on 0800 401 0000.

## This sheet will:

1. Help you get your device set up so it works for you.
2. Help you download apps.
3. Help you use your device to make and receive video calls.

## Setting your device up so it works for you

### Getting started

**Your sight.** You can use VoiceOver, a screen reader that reads out loud what's on your screen. You can also use Zoom, which enlarges text and other content on your screen.

**Your hearing.** You can use Live Captions, which shows captions for audio content. You can also use AssistiveTouch, which lets you use your phone with a single tap. You can also use the MFi (Lightning to USB) Digital Audio Adapter (sold separately).

**Your dexterity and mobility.** You can use Switch Control, which lets you use your phone with a single tap. You can also use the MFi (Lightning to USB) Digital Audio Adapter (sold separately).

# Using your device for video calling

---

When you use your device for video calling, you can use FaceTime on your Mac, iPhone, or iPad, or you can use a third-party video calling app. You can also use your device to join a video call on a computer.

## Using FaceTime

1. Open the **FaceTime** app.
2. Tap **Start a Video Call**.
3. Tap **Start a Video Call**.
